TAPE #112

March 11, 1993

4:17 p.m. - 7:31 p.m.
(Tape 112)

JOHN: -- any of the other nurses get in to see him?

MR. SCHNEIDER: You know, in honesty they haven't.

JOHN: Um-hum.

MR. SCHNEIDER: They haven't yet.

JOHN: Yeah, if, if he can get them to do that that might be a good thing --

MR. SCHNEIDER: Right.

JOHN: -- to check his vital signs.

MR. SCHNEIDER: See, what happened is I guess he wanted -- Ollie came -- Oliver, they call him Ollie, he came in there and so he's giving him a little time and trying to encourage him and everything. And he wanted to ask him a few questions and he just told him to remember to, you know, hang onto his Bible and so forth and -- or after he finds a better foundation, you know, follow his conscience of course.

JOHN: Right.

MR. SCHNEIDER: So, I, I just stepped in there a little bit and he says, you know, if -- you know, just follow right on through so --

JOHN: Right. Well --

MR. SCHNEIDER: Yeah.

JOHN: -- that's, that's really great and I really appreciate your efforts very much, I really do.
MR. SCHNEIDER: Well, you know, I mean right from the beginning, you know, I mean I've always wanted the best of course, and --

JOHN: I know that, and it's, it's coming true.

MR. SCHNEIDER: Yeah.

JOHN: So well, I've, I've really appreciated everything you've done. And how did David feel about their leaving? He just said well --

MR. SCHNEIDER: Well, you know, he's always believed in, you know, the freedom of one's -- I mean, that, that was always -- well, right from the time I met him he was always that way that, you know, what you're going to hear -- he said step away, wrestle with it come back. And he's done this with everybody, including myself. That's why I said I like had six months. So, you know, like even these people, now he says you always got to relook at something. It's not like you're in something once and for the rest of your life, you know? And so he explained that again. He says look at it again and again and, and wrestle with it. So --

JOHN: Yeah.

MR. SCHNEIDER: -- so these feel that it'd be best for them that they, that they step out.

JOHN: Well, fine.

MR. SCHNEIDER: Yeah.

JOHN: Fine, that's --
MR. SCHNEIDER: And he says, he says he's with them 100 percent. You know, if that's what you need to do you've got to follow through he says. Because of he says I believe that there's a God and you've got to stand and answer for yourself. So he says as I do, so that's basically what he told them.

JOHN: Yeah, yeah. Well, you know, I'm getting back to his health. It does concern me, you know?

MR. SCHNEIDER: Yeah.

JOHN: Do you know if he's getting any new pain like kind of where those wounds --

MR. SCHNEIDER: I didn't, I didn't get to ask him really too much because I was trying -- I didn't want to break my attention from --

JOHN: Sure. No, no --

MR. SCHNEIDER: -- you know, Ollie's movement and --

JOHN: I can appreciate that.

MR. SCHNEIDER: -- and, yeah, once he started showing the interest I thought I'd better just stay with that and --

JOHN: Yeah. You're right, you're right.

MR. SCHNEIDER: Yeah, so I've, I've done that more.

JOHN: Good.

MR. SCHNEIDER: And also talked to Kathy to help her get going along with these -- a couple of
these others that I mentioned. And I've also started
talking with a few more as I told you but I guess
I'll --

JOHN: Great.

MR. SCHNEIDER: -- have to spend more time
with that still.

JOHN: Well, just keep working on it.

MR. SCHNEIDER: Right.

JOHN: It sounds like we're making really
good progress here --

MR. SCHNEIDER: Right.

JOHN: -- good momentum.

MR. SCHNEIDER: Okay.

JOHN: Good, and thank you for everything.

MR. SCHNEIDER: Well, you know, I'm still
trying. You know, it seems like it's still short of
what one would like, you know, like say from a week
ago, of course, you know?

JOHN: Sometimes the first step, you know,
gets things moving.

MR. SCHNEIDER: Well, that's what -- the way
I was looking at it too. You know, I mean, from a
week ago I thought we all were going to be out, it'd
be over. And I did wait for a while and I mean I
still am but I still want to work with these people
and, and try to get the best done here so --

JOHN: Well, you know, I'm really sure that
they appreciate what you're doing for them.
MR. SCHNEIDER: Well, maybe ultimately they will. I don't know --

JOHN: They will.

MR. SCHNEIDER: -- now, but hopefully ultimately they will.

JOHN: They will, in the not-too-distant future I'm sure.

MR. SCHNEIDER: Yeah. Oh, there's -- one of the guys that went and fed the chickens, he's back here by me and he wanted -- what, what did you need now? Oh, would it be okay if two guys went out to feed the chickens and empty some dirty water I guess he's asking me here.

JOHN: Let me check on that. I'll --

MR. SCHNEIDER: Okay.

JOHN: Hopefully there'll be no problem with it and --

MR. SCHNEIDER: Okay.

JOHN: -- I'll just, just make a call on it --

MR. SCHNEIDER: Oh, and David --

JOHN: -- and sure we'll get it done.

MR. SCHNEIDER: -- David, I told him I was going to talk to you and he says, oh, he says, he says, I really do, he says I like John. He says, tell him that if he's been listening to anything on the radio, apparently Paul Harvey made some kind of a statement about there being a lot of UFOs and there
was a statement of some astronomer sighting a star moving quickly toward this direction. And I guess there's been a number of statements on the, on the airwaves and he --

    JOHN: Oh, really?

    MR. SCHNEIDER: Yes, he said -- he says that this is what I've been talking about. He said this is Psalm 68, he says God has 20,000 chariots. He says one of those chariots are so large they're able to carry all the inhabitants of the earth in one. And he says it's a reality, he says. And I like these guys. He says I want them to be able to at least take a little time and look at those things and weigh it, weigh it out. So he just -- he mentioned that to me. He said they're, they're coming toward the earth and, and I guess it's been on a number of broadcasts apparently on -- news.

    JOHN: Oh, is that right?

    MR. SCHNEIDER: Yeah.

    JOHN: Well, this could be a sign.

    MR. SCHNEIDER: Well, this is what he was saying, that's exactly what it is. He says there are -- well, of course the Bible talks about a lot of that type of thing happening in the final days.

    JOHN: Yeah.

    MR. SCHNEIDER: But he, he asked me mention that to you or pass it on to you and I said I would do
that.

    JOHN: I appreciate you doing that.

    MR. SCHNEIDER: Okay.

    JOHN: I, I think that might be something really significant.

    MR. SCHNEIDER: Right.

    JOHN: And Kathy had mentioned you were, you were a real source of help to her and --

    MR. SCHNEIDER: Okay.

    JOHN: -- everybody else for that matter, so --

    MR. SCHNEIDER: Well, good. How long are you going to be there yet, John?

    JOHN: I'll be here until 6 o'clock.

    MR. SCHNEIDER: Okay.

    JOHN: But if you need -- if you want me to stay around a little bit I will.

    MR. SCHNEIDER: Well, what I'm going to do is I haven't been able to -- actually, about four or five hours have gone by. I haven't been able to use the facilities here. You know, once you get talking with somebody I just figured that was more important.

    JOHN: Yeah, I think so too.

    MR. SCHNEIDER: I'm kind of walking around here right now, so --

    JOHN: I think so too.

    MR. SCHNEIDER: Okay. I --

    JOHN: Well, why don't you go ahead and get
a chance to do that?

MR. SCHNEIDER: Okay, and I'll be getting back with you. I'm going to try to talk to a few more and I'll get back to you.

JOHN: I'll talk to you later. Thank you very, very much.

MR. SCHNEIDER: Okay, no problem.

JOHN: Right.

MR. SCHNEIDER: Talk to you later, John.

JOHN: Talk to you later, Steve.

MR. SCHNEIDER: Bye-bye.

JOHN: Bye.

(Phones hung up.)

JOHN: Yeah, Steve?

MR. SCHNEIDER: Yeah, I was just going to call back. Do you know, I -- these guys are pestering me here. They -- I forgot to get an answer about them feeding the chickens and throwing the water out I guess. John?

JOHN: Yes, I'm sorry. Yes --

MR. SCHNEIDER: Oh, okay --

JOHN: -- absolutely go ahead.

MR. SCHNEIDER: Okay. They'll just probably be out there for a few minutes and they'll be right back in again.

JOHN: That's fine. Go ahead.

MR. SCHNEIDER: Okay, thanks.

JOHN: Thank you.
MR. SCHNEIDER:  Bye-bye.

JOHN:  Bye-bye.

(Phones hung up.)

UNIDENTIFIED MALE SPEAKER #1  John Tremont?

JOHN:  Yes, one moment, please.  Hi.

UNIDENTIFIED MALE SPEAKER #1:  Hello, Mr. Tremont?

JOHN:  Mr. Tremont?

UNIDENTIFIED MALE SPEAKER #1:  Yes.

JOHN:  No, no, I'm sorry.  Mr. -- there's no Mr. Tremont at this number.  This is a newly-issued number.

UNIDENTIFIED MALE SPEAKER #1:  Okay.  Sorry to disturb you.

JOHN:  That's no problem.  Thank you.

UNIDENTIFIED MALE SPEAKER #1:  Okay, bye-bye.  (Phones hung up.)

UNIDENTIFIED MALE SPEAKER #2:  Hello?

UNIDENTIFIED MALE SPEAKER #3:  Is Robin there?

UNIDENTIFIED MALE SPEAKER #2:  Pardon me?

UNIDENTIFIED MALE SPEAKER #3:  Robin?

UNIDENTIFIED MALE SPEAKER #2:  I think you have the wrong number.

UNIDENTIFIED MALE SPEAKER #3:  All right, thanks.

(Phones hung up.) (Phone ringing)

MR. SCHNEIDER:  Hello?
JOHN: Steve?

MR. SCHNEIDER: Yeah.

JOHN: John.

MR. SCHNEIDER: John Cox?

JOHN: Hey, how you doing?

MR. SCHNEIDER: Not too bad, not too bad.

JOHN: Had a pretty good day, huh?

MR. SCHNEIDER: Oh, yeah, real good day. 

Real good day. I was -- about an hour or so ago I was in there talking to David too and he was saying well, if he -- if you talk to any others encourage whoever and so I'm still talking to a few people around here.

JOHN: How does he feel?

MR. SCHNEIDER: Pardon?

JOHN: How does David feel?

MR. SCHNEIDER: He -- he went back to sleep again -- I, I sat in there for a little while talking with him --

JOHN: Yeah.

MR. SCHNEIDER: -- and someone said they heard on the, the radio that the message was that he -- he talked -- no, I forgot what they told me, but it was not so; you know, they had to ask permission to go or something, that's not true at all. You know, I mean the, the names were mentioned some of the names I mentioned so it would have only had to --

JOHN: Yeah.

MR. SCHNEIDER: -- come through there of
course. But --

JOHN: Yeah.

MR. SCHNEIDER: -- no, they didn't ask his permission at all.

JOHN: Okay.

MR. SCHNEIDER: But Oliver did want to talk to him. He went in there and asked --

JOHN: Sure.

MR. SCHNEIDER: -- about some religious things and that's what he was talking to him about, but he had already told me he wanted to go and I worked with him for a while on that.

JOHN: Well --

MR. SCHNEIDER: But I am still talking with a few other people here and I guess they're all looking to -- sometime in the morning then.

JOHN: Okay.

MR. SCHNEIDER: And I was hoping to do a little more communicating with David though, but, you know, because of this crazy illness, the wound --

JOHN: I think, you know, what you heard on the media was probably just some press speculation.

MR. SCHNEIDER: Yeah, they maybe chose their own words or something --

JOHN: I really do, because --

MR. SCHNEIDER: -- so I don't know.

JOHN: Hey, they've been doing plenty of that, huh?
MR. SCHNEIDER: Oh, yeah, oh, yeah.

JOHN: The -- John was telling me that David said he heard on Paul Harvey that he mentioned a star heading this way and --

MR. SCHNEIDER: Yeah, I guess it was on a couple of -- well, David didn't hear it and neither did I, but a couple of others listening to radios came --

JOHN: Oh, okay.

MR. SCHNEIDER: -- and all told us the same story. A star --

JOHN: You, you ready for this?

MR. SCHNEIDER: Go ahead.

JOHN: The Houston Chronicle, today's paper --

MR. SCHNEIDER: Okay.

JOHN: -- captioned, "This Is One Hot Guitar: Neutron Star Is Moving Darn Fast Through Our Galaxy." They've got a whole article on it.

MR. SCHNEIDER: John, could I ask you a favor?

JOHN: You bet.

MR. SCHNEIDER: They did a series of course, The Tribune, The Waco Tribune --

JOHN: Uh-huh.

MR. SCHNEIDER: -- and we -- the last thing we got to see about that was from Gonzalez, Robert Gonzalez. He brought the Sunday paper over and of
course it went then from I guess it was Monday on
through to Friday and we never got -- we were to get
papers delivered here but we've never seen them. I
just wanted -- it's mainly Mark Bro (phonetic) story
of course and I'm just curious as to what he had to
write about us. I can basically guess.

JOHN: Uh-huh.

MR. SCHNEIDER: But is, is there any way we,
we could get copies of that given to us and maybe that
Houston -- what is it, the Houston Chronicle?

JOHN: The, the article that I have here?

MR. SCHNEIDER: Yeah. It's --

JOHN: Yeah, it's kind of remarkable where
it talks about this guitar-shaped heated material and
it's been named the Guitar Nebula. I mean --

MR. SCHNEIDER: No kidding? David will --

JOHN: Some timing, huh?

MR. SCHNEIDER: I, I tell you one thing,
he's got a lot to say about it. I know you guys --
John, and I know it's too weird, to wild, I know you
don't believe it. But if you ever heard the man get
into physics and astronomy, that was one of the
biggest things that blew -- all my life I've loved
astronomy, took classes, listened, watched. And I run
into him and he went so beyond any astronomer and I --
that made me say to him, "Where did you get the
information?"

JOHN: Uh-huh.
MR. SCHNEIDER: I said, "What school did you go to?" I didn't know that he was not a graduate from some university, and he said that he dropped out of school in high school. So, I mean, that's what started already getting my attention. But yeah, it's, it's definitely interesting about what --

JOHN: It's kind of bizarre isn't it?

MR. SCHNEIDER: Well, to him it isn't because he --

JOHN: Oh, I know.

MR. SCHNEIDER: -- he said he will -- he wants to actually to get on the phone and tell you guys more things that are going to happen ahead of time so when they happen you can see them develop. You know, he mentioned Psalm 68 and he mentioned -- he'll get into the Book of Job which is a very deep book and the Chapter 38, 39 and so right in there, 37, 38. Deep mysteries to do with the universe, matter, antimatter, astronomy, so forth.

JOHN: Hey, I'd rather have David come out and talk to me about it though. Huh?

MR. SCHNEIDER: John, I, I mean I --

JOHN: Wouldn't we all.

MR. SCHNEIDER: I -- well, I believe that.

JOHN: Sure.

MR. SCHNEIDER: I mean I, I know you would want that.

JOHN: Sure.
MR. SCHNEIDER: But I mean, there's a, there's a part of these things that he wants you to be able to see and judge and if it's not so well you lost a little time.

JOHN: Well, I -- the, the biggest thing that concerns me right now is you and I both know that David hasn't been doing too well for a while and -- or he would have been out -- up and about. Because he --

MR. SCHNEIDER: Yeah, you're right, he hasn't --

JOHN: -- he was in, he was in pretty good shape.

MR. SCHNEIDER: He hasn't been up and about in the last two days, that's true.

JOHN: He was down for a while then he, then he really pepped up and started feeling much better.

MR. SCHNEIDER: Right.

JOHN: And, you know, all the, the vibes that we're getting is that with this seepage and everything --

MR. SCHNEIDER: Yeah.

JOHN: -- it, it's not good and it could turn into septicemia in nothing flat and become gangrenous.

MR. SCHNEIDER: Well -- I, I seriously have been doing the best I can since the time I -- I tell -- it's, it's so draining and wearing when you're sitting down talking to people and trying to give them
other perspectives.

    JOHN: Oh, I'm sure.

    MR. SCHNEIDER: You know what I mean? I mean it has --

    JOHN: Oh, sure.

    MR. SCHNEIDER: -- been a long day. Last night even I went down and talked to those people. I tried to pick up right away this morning. I went off and found them, went and talked to Oliver again, went and talked to a few more and -- by talking to Kathy and spending time with her. She decided to make her decision. And, and we -- and in fact David, I even said to him, you know, we don't want to even use it as a bargaining anything. You know, that's never been the thing in the first place, John. I mean, you realize that.

    JOHN: Sure.

    MR. SCHNEIDER: So, we want to get these people out. They, they made their choice and, you know, I'm -- whoever wants to do whatever, you know, I'm for that. That's the main thing.

    JOHN: Well, did you get a chance to talk to Floyd and --

    MR. SCHNEIDER: I -- he --

    JOHN: -- Cleve Doyle or Clive Doyle or --

    MR. SCHNEIDER: Yeah, I went -- last night when I went, went to see them Floyd was already sleeping and --
JOHN: Yeah.

MR. SCHNEIDER: -- I called his name, he answered, and I says that's okay, I said I'll talk to you in the morning.

JOHN: Yeah.

MR. SCHNEIDER: But what I could do if you want, I could -- you know, I can go -- they're up and around --

JOHN: You know, before it gets too late.

MR. SCHNEIDER: Yeah, yeah.

JOHN: Because there was -- I know there were four others and you were able to get Greg on the phone, but there were four others.

MR. SCHNEIDER: Right, right.

JOHN: And would you like -- you'd like to get this article in there, the --

MR. SCHNEIDER: Oh, I'd love to, you know, just for myself. I'm kind of -- I'm definitely curious to see that about the stars. Is, is -- it's probably not very long. It's probably a little caption or --

JOHN: It's -- no, it gets -- it's three full columns. I can read you part of it --

MR. SCHNEIDER: No kidding?

JOHN: -- if you'd like to hear it.

MR. SCHNEIDER: Sure, sure. I'd love to.

JOHN: It's -- it starts off, "Some very hot licks from the fastest star ever found has created a
heavenly guitar-shaped glow says astronomers."

MR. SCHNEIDER: Holy, do me a favor.

JOHN: Yeah.

MR. SCHNEIDER: I would love to have if you can tomorrow can we work it out where you can get me a copy of it, seriously?

JOHN: We'll get it in to you tonight.

MR. SCHNEIDER: Even if you run a copy off a -- great, but it's pouring out there.

MR. SCHNEIDER: Well, I guess we'll have to dress somebody up in some kind of a plastic suit here or something.

JOHN: You got a slicker in there I'm sure, huh?

MR. SCHNEIDER: Oh, yeah, there must be something in here.

JOHN: Yeah.

MR. SCHNEIDER: All right.

JOHN: And it's talking how this thing is traveling at 1,800 kilometers a second and, you know, it's, it's, it's a very interesting article.

MR. SCHNEIDER: Wowie! I, I would appreciate --

JOHN: They've already named it the Guitar Nebula.

MR. SCHNEIDER: I think that would really
Lift David up, I would. I mean, I'd, I'd wake him up for that for sure.

John: Hey --

Mr. Schneider: Because he's into the hot licks --

John: -- he probably needs something to --

Mr. Schneider: -- he's, he's an awesome, he's an awesome guitarist. This whole message was to go by stringed instruments is all the prophecies talk about, John, all of them do. It's called shiggaion. But anyway, I mean, it's very -- the language you were reading there is what he's always been into.

John: Well, he could probably use something to lift him up a little, huh?

Mr. Schneider: Oh, yeah, oh, yeah, definitely.

John: He's I'm sure at a, at a low ebb physically.

Mr. Schneider: Well, yeah, yeah.

John: Maybe not, maybe not emotionally.

Mr. Schneider: Not mentally or spiritually. He, he -- see, all the prophecies talk about one day how God gets up off his throne and comes on down. You can look in any book of the Bible, Ecclesiastes 12, you can look in all the Psalms, Daniel 12:1 it talks about God getting up off the throne, the Throne of Judgment and coming down and this is what he's talking about. He, he said that God showed him -- God hasn't
told him anything but wait -- but he was showing a picture of seeing God getting off the throne, there being a lot of activity in the heavens. And he says you tell these guys to watch the heavens, you're -- they're going to see a lot more taking place. They're not going to believe it, they're going to count it as, as, as --

JOHN: Hey, could be something he's, he's been looking for, huh?

MR. SCHNEIDER: -- as a coincidence.

JOHN: Could be something he's looking for.

MR. SCHNEIDER: Well, I know you don't believe that, but of course, you know, I have hopes.

JOHN: Hey, I believe he does.

MR. SCHNEIDER: John, well, that's about it.

You got that right.

JOHN: You know, and, and his -- you know, I can't, can't deny that. I believe he does.

MR. SCHNEIDER: Yeah, right.

JOHN: Let me, let me --

MR. SCHNEIDER: John --

JOHN: -- just give you one --

MR. SCHNEIDER: Okay.

JOHN: -- the second paragraph on this thing.

MR. SCHNEIDER: Okay, yeah, do so.

JOHN: It says, "The tiny object is a
neutron star only 10 miles in diameter, it's moving through our galaxy, the Milky Way, at a tremendous rate, perhaps 1,800 kilometers per second, or fast enough to travel from New York to California in a bit over two seconds," you know, and it goes on and on. And it's --

MR. SCHNEIDER: Right. Well, mention the part about the hot licks again and the guitar so I can get that in my mind real --

JOHN: "Some very hot licks from the fastest star ever found has created -- " --

MR. SCHNEIDER: Okay.

JOHN: -- " -- has created a heavenly guitar-shaped glow says astronomers."

MR. SCHNEIDER: Let me call you back, okay, John?

JOHN: Yeah.

MR. SCHNEIDER: Okay. Call you right back.

JOHN: Bye.

(Phones hung up.)

MR. SCHNEIDER: Hello, John?

JOHN: Hey.

MR. SCHNEIDER: Yeah, I'm, I'm talking here to David. He'd like to hear that article from the paper.

JOHN: Yeah.

MR. SCHNEIDER: Could you read the entire thing to him?
JOHN: Sure.

MR. SCHNEIDER: Okay. Do you have it there?

JOHN: You bet.

MR. SCHNEIDER: Okay. Here he is. Just a moment.

JOHN: Okay.

MR. SCHNEIDER: Okay.

JOHN: You ready?

MR. SCHNEIDER: Just a minute.

JOHN: Okay.

MR. SCHNEIDER: He's -- we're trying to move something so we can get the phone in here. Hello?

JOHN: Yeah.

MR. SCHNEIDER: Okay. Here he is.

MR. KORESH: Hello, John.

JOHN: Hey, bud, how you doing?

MR. KORESH: I'm all right.

JOHN: Not too hot, huh?

MR. KORESH: Huh?

JOHN: Not feeling too well, huh?

MR. KORESH: I'm trying to recuperate.

JOHN: Well, maybe this will help you a little bit. You ready?

MR. KORESH: I'm ready.

JOHN: Okay. The caption of the article is, "This is One Hot Guitar: Neutron Star Is Moving Darn Fast Through Our Galaxy," and it's a Houston Chronicle science writer in Today's Houston Chronicle. It
starts off, "Some very hot licks from the fastest star ever found has created a heavenly guitar-shaped glow says astronomers. The tiny object is a neutron star only 10 miles in diameter. It's moving through our galaxy, the Milky Way, at a tremendous rate, perhaps 1,800 kilometers per second, or fast enough to travel from New York to California in a bit over two seconds."

MR. KORESH: Moving pretty slow.

JOHN: It's fast by my standards.

MR. KORESH: I know.

JOHN: "The star and its glow are described in an article published today in 'Nature' magazine by astronomer James M. Cordis of Cornell University in Ithica, New York, Cornell graduate student Scott C. Lundgren and Roger W. Romani, a Stanford University Astrophysicist. Romani said the star is trailing a stream of gas and particles as it speeds through space like a jetliner leaving a contrail across the sky. The glow of this heated material is in the shape of a guitar but it can only be seen with the most powerful telescopes. Appropriately, the object has been named the Guitar Nebula. Romani said the unusual shape is probably caused by the shockwave from the star crashing through the glass -- the gas clouds of differing densities. The phenomenon called a 'bow shock' is analogous to the wave breaking from the bow of a speeding boat. Cordis described the Guitar
Nebula as the most spectacular version of these bow shocks we've ever seen. It's a fairly average pulsar but it's forward motion is exceptional. The star the formed the nebula is known to astronomers as PSR2224+65. The number also gives the location of the star in the constellation Cepheus. Cepheus is low on the northern horizon now but will be high in the northern sky in late-summer. 'The star is moving darn fast,' Romani said, pointing out that it has moved into another constellation. In a million years it has moved from Serpens to Cepheus.'

MR. KORESH: That's incorrect.

JOHN: Well, all I'm doing is quoting the article.

MR. KORESH: Yeah. So it's --

JOHN: "Despite that kind of speed Romani said snapping a picture of the nebula required a two-hour exposure using special equipment installed in the great 200" Palomar telescope in California. He said the pulsar formed about a million years ago when a star ran out of nuclear fuel and collapsed to a very high density. Pulsars normally move about ten-times faster than ordinary stars but this one is far faster than most pulsars. 'Otherwise' Romani said, 'it seems rather ordinary.' Curt Michael of Rice University's Department of Space Physics and Astronomy said, 'Astronomers cannot explain such high velocities with certainty.' He said he suspects the star was boosted
by an off-center supernova explosion which blew some material one way and kicked the remaining neutron star the other. 'Other astronomers more skeptical in that theory,' Michael said -- another possibility is that the star once was one of a pair of white dwarf stars closely linked by gravity. If one exploded the pair would have been flung apart. 'It's possible for the mechanism to work, but how common it is not known,' Michael said. Romani said the crucial task in calculating the speed of the star was to determine its distance which they found to be about 6,000 light years away, well within the Milky Way. A light year in distance light travels in a year about 5.9 trillion miles. But Romani said the star's speed is so great that millions of years from now it will escape into intergalactic space." That's the article.

MR. KORESH: Well, at least they see something.

JOHN: You want it sent in to you so you can read it?

MR. KORESH: No, I, I was, I was just --

JOHN: The reason I ask is we have another video of the children and we could certainly put a copy of this article with the video of the children and send it on in to you.

MR. KORESH: That's all right. We do a lot of discussion here about stars and the constellations and their origin and about God and matter and
antimatter and why the universe is the way it is and it's one of the schedules that we teach our students.

JOHN: Um-hum.

MR. KORESH: A lot of guys who have been into astrology and astronomy have come here and in very simple terminology they've been blow away when they've learned things about the structure of humanity and the images of humanity and its relationship to the universe. It's -- we always used to say that today's inspiration which is the knowledge within is tomorrow's common knowledge and man becomes quite familiar with common knowledge to where it becomes indifferent. You know, many people in the world don't know what makes a toaster toast?

JOHN: Um-hum.

MR. KORESH: You know? They use them but they never could fix them could they?

JOHN: Yeah.

MR. KORESH: So --

JOHN: Well, do you think this is what you meant when Steve said that this may be a sign?

MR. KORESH: Oh, no, no, no, no, no, it's --

JOHN: Yeah.

MR. KORESH: -- the -- you're going to, you're going to see a lot of strange events happening in our atmosphere. There's a, there's a lot of, there's lot of aid already assisting here now, you
know, the 20,000 chariots have already arrived anyway long ago anyway. It's, it's just a matter of, you know, the finishing of the probation of this generation. And you have to admit, John, that even though the detailed truth has not been permitted to be given, you have to admit that just the announcement of seven seals is the last subject matter of the Bible. You know, it's the last book. And whether a man is allowed to have their third chance to teach these things or not, just the announcement of them is something that's going to cause men to search their hearts and their own reasoning because that's where it all begins anyway. If a person looks at these subjects and says within their soul the light within them that well, I don't know these things and they start searching, well, that's a good probationary sign the cross still covers them. But like Psalms 1 says, "Those who scoff and those who transgress and those who make a play with their own carnal knowledge and defy the mystery are defying the very subject of God." It says they will not stand in the judgment.

JOHN: Um-hum.

MR. KORESH: Their attitude -- "and every man by his words you shall be justified and by your words you shall be condemned in the judgment." And besides, everybody has already subject to judgment now because everyone's already read Matthew, Mark, Luke and John haven't they?
JOHN: Um-hum.

MR. KORESH: The Gospel has already been given and everybody knows the righteousness of Christ. All they lack to know is the mystery, something additional, it's extra oil, you know? No, Deuteronomy talks about the star, all the prophets talk about the stars. But, you know, the way that travel takes place and throughout the universe is totally different than the way it takes place in this world. You know, everything is measured in wavelengths and forms be it through the audio spectrum or the visual spectrum. Everything is measured in lines. When you read in the Psalms and in the prophets about how God stretched forth his line from the beginning of creation, you know, everything is finite or infinite in measure; you know, what the stars are, how they were really created and what matter is and how that when -- well, something man can even understand in the building blocks of creation is the atom. You know, here is a little systematic working tool of the universe and if any force is greater than the force contained in the perimeters of the atom, should such a force compress an atom it can only compress it to the equity of its own pressure and then it explodes either through fusion or fission. But of course that law does not always hold true and probabilities such as Einstein was given to know if there was a force far beyond and greater than the atom then the atom can be compressed
to where it becomes antimatter. And if it is
antimatter hypothesis states that it still retains not
its own equal force or energy, but it increases on the
opposite spectrum. So this is where you get into the
realms of spirituality by like the Apostle Paul saying
that the things are not seen are greater than the
things that are seen, and the things that aren't seen
have more power than the things that are seen because
the things that aren't seen are more real than the
things that are. Visual things are more primitive
than invisible things. Of course, you know, the
angels are invisible aren't they?

JOHN: Yeah, I haven't seen any.

MR. KORESH: Exactly. Unless they
(indiscernible) unless they take on the atomic form.
Of course, it's also a proven fact that man is
constructed of the elements of the earth. We're dust.
We're dirt, you know? And what holds us together?
Well, if we break it down in the scientific realm,
there's no explanation what causes molecule and atom
to combine and to form the way it does. We call it a
hidden law, called genetic, call it information. But
where did the information come from, who established
the law? From the conception of the sea, you know,
what determines the image of a fish, the image of a
man, the image of a horse? Now, you got to go all the
way back to the beginning to start a foundation before
these questions even have their perfect visual
foundation to even begin to start answering, but there's answers to these things. For the simple at heart there's answers and wisdom. Now, when Isaiah talks about God commands Israel to look into the heavens and behold all the stars. God says behold who hath created these things? Bringest out their host by number. Well, there are many galaxies, many universes of galaxies and many stars that are unseen, many universes beyond universes of universes, you know? If it's true that my father sits on a throne, but if it is true that he gave me a book, then I'm not really a cult leader. As a matter of fact, there's far more stars than there are people, and there's far more planets than there are stars, and there's far more inhabitants of those planets than there are planets and they all believe in the seven seals.

JOHN: Well, that -- what you're talking about is faith though isn't it?

MR. KORESH: No, it's reality.

JOHN: Well --

MR. KORESH: You see, it's reality for me --

JOHN: What, what --

MR. KORESH: -- but it's faith for those who have to pick up a book. And it's a simple little -- see, because you cannot bring upon the minds of men realities far above and beyond their reality. Just as today if me and you was to jump in our new car and drive back 200 years ago we would be worshiped as gods
wouldn't we? Wouldn't we?

JOHN: Um-hum.

MR. KORESH: The mind and perception of that era of time -- it's just like even in your own documentaries of this world, your scientists of this world who've been blessed with small, teeny-tiny rays of light, they've compiled documentations from all over the world to where ancient empires have, have had landing strips and places to honor those who have visited this world from ancient times, you know? The Chariots of the Gods is a documentary, it's a scientific documentary. And they've through hieroglyphic forms of art have shown that the possibility of man flying into the atmosphere was a reality of their mind, you know? And it shows them in space vehicles and it shows them in, you know, different vehicles. That's why, you know, like when Nahum tries to explain about the last controversy with Messiah he says there'll be a messiah or a war with messiah and it'll involve chariots with flaming torches, you know? It's tanks, John. And right there in Nahum the prophet if, if he saw something for true maybe, maybe he was assisted, maybe he was assisted by beings from other worlds. I mean, I know about beings from other worlds but you couldn't believe me because I told you so.

JOHN: Doesn't mean I don't believe you do though.
MR. KORESH: Right, I do, and no one can take that from me.

JOHN: No. I don't think anyone's --

MR. KORESH: It's just like --

JOHN: -- anyone's trying to either, do you?

MR. KORESH: No, no. It's just the elemency of unbelief like Paul states in Hebrews to when Hosea delivered Israel from Egypt then he had to destroy them in wilderness because of unbelief. So that's why he warns the New Testament era, he says, "Therefore let us fear least a promise being left unto us that we should enter into God's rest any of us should seem to come sure of it." He goes on to explain that when God begins to unfold his mysteries it'll always be something beyond man's normal reality but yet the reason why this is done is so man can prepare his heart and mind to see these realities become present reality. It's just, you know, like Ezekiel's chariot when you read in Ezekiel's prophecy about that lightening, that flaming, that awesome vehicle. Have you ever read Ezekiel 1 and 2?

JOHN: No, I don't believe I have.

MR. KORESH: Well, you know, the reason why that God's never passed judgment on the world is because God cannot pass judgment on the world until Daniel's prophecy is fulfilled. In other words, man has to first be given sufficient evidence that these prophets were true and no one could understand their
subjects of flaming chariots who travel with the sound of thunder and, and travel at the speed of lightening and all that until man can begin to see the possibilities. I mean, you have your little jets, you know, you have your little airplanes, you have your spaceships, you know, you're -- they're, they're quite primitive. But, you know, man's gone to the moon hasn't he and they've sent their satellites throughout the planets of the -- of our solar system haven't they?

JOHN: Well, we're looking at man's standards there though aren't we, you know?

MR. KOESH: And the ancient prophets have spoken of this long before.

JOHN: Um-hum.

MR. KOESH: You know, God's not only the god of the Jews, you know, God has also conversed with many ancient empires, you know? The Koran and all, all, all forms of people --

JOHN: Um-hum.

MR. KOESH: -- and all people are God's people. The people of the four divisions of the Tower of Babel, the red, yellow, black and white. The Orientals have, have been far more religious and spiritual towards their god than Israel has. And on the contrary, the most rebellious people of all in the, in the records has been Israel. And, you know, the Caucasian race of all races have been predominant
and more arrogantly set forth as any other type of people which God has brought forth from the four faces of the earth. But it's just like I was explaining to one of the gentlemen about the twelve laminations, the precious gems that are below the City of God, you know, in the Book of Revelation. The world knowing about laser and how that light is refracted and how that light can be solidified through opposing energies and polarities of energies. You know, these are -- there's a natural force that generates through our universe. There's a natural power that if the key of harnessing was obtained there's no limits to what man's possibilities could be. Of course, man's made in the image of God too, both form and feature and also in his mind, you know? But --

JOHN: Let me, let me ask you something.

MR. KORESH: Sure.

JOHN: You know, we haven't talked to you in about Lord, it's almost been three days, huh? And, and --

MR. KORESH: Seems like one night.

JOHN: Pardon?

MR. KORESH: I've done a lot of sleeping.

JOHN: Well, I guess you've done a lot of praying too, huh?

MR. KORESH: Well, my mind's in continual connection with that --

JOHN: Yeah.
MR. KORESH: -- source of information.

JOHN: And it really -- you know, you had your bad days to begin with and then boy, you really sounded great. And you --

MR. KORESH: I've been shot.

JOHN: -- and you were -- you really seemed to be picking up and, and then I guess you, you --

MR. KORESH: The human body, you know how it goes through --

JOHN: We went through some difficult times, but did, did Steve talk to you about septicemia?

MR. KORESH: I'm sorry. What did you say again?

JOHN: Did Steve talk to you about the concerns that we were getting from our medical people about septicemia, the infection of the blood?

MR. KORESH: No.

JOHN: And that it was important that you make sure that you --

MR. KORESH: Consider those things.

JOHN: -- constantly monitor your blood pressure and your pulse rate because it's a serious thing. You remember Jim Hensen and the Muppets and, and that's exactly what, what happened to him and it was a very, very sudden thing and your temperature is important.

MR. KORESH: Did he, did he die?

JOHN: You bet he did --
MR. KORESPH: Hmmm.

JOHN: -- in about 24 hours once, once it formed. And if formed from, from a very minor, minor thing where an infection got into the blood system and very, very similar to a gangrenous situation.

MR. KORESPH: Machine, machine broke down I guess.

JOHN: You bet, you bet. We don't want to see that happen either.

MR. KORESPH: No.

JOHN: You know, you don't want to see it happen, we don't want to see it happen.

MR. KORESPH: No, there's too much of this judgment that has to finished.

JOHN: Yeah, and you've got to be healthy and lead your flock out of there, huh? And a healthy -- not only emotionally mentally healthy David, but a physically healthy David.

MR. KORESPH: I'm stronger than what people realize.

JOHN: Well, you sure had us concerned because we hadn't, we hadn't heard anything from you, you've been doing a lot of sleeping and that's one of the things that our medical people tell us occurs, excessive sleeping. And, you know, if you've got a good RN there you'd better keep her busy and let her watch you and let her tend to you because it's going to be important. And I'm, I'm sincere when I tell you
I don't want anything to happen to you.

MR. KORESH: I don't want nothing to happen to you all too.

JOHN: Well, we're in a little different environment out here than you're in in there and --

MR. KORESH: You want to hear about a mystery?

JOHN: A mystery?

MR. KORESH: About some pets that I have in store for you all?

JOHN: Some what?

MR. KORESH: Some pets.

JOHN: Pets? P-E-T-S?

MR. KORESH: Yeah, pets.

JOHN: What's that?

MR. KORESH: Well, you know what a submarine is don't you?

JOHN: Sure.

MR. KORESH: You know what sonar and depth and, and all the sophisticated sciences of telecommunication is under the ocean, right? You know, sound travels more thoroughly through water than it does through atmosphere, right?

JOHN: Um-hum.

MR. KORESH: You know, I want to show you -- I want to read something here to you. It's found, it's found in, in Job 38. It's a lot of mysteries that scholars have never understood. But I want to
tell you about these pets. There are some in Africa
and there's some in South America and there's a whole
bunch of them out there in your great big little water
trough called the oceans and you all are fixing to see
these pets.

JOHN: Well, you want to explain it to me?

MR. KORESH: Sure. You ever heard of the
leviathan? You ever heard of behemoth?

JOHN: Uh-uh.

MR. KORESH: Okay. Have you heard -- you
all, you all, you all for a long time have heard of
the Loch Ness Monster, right?

JOHN: Why, sure. Everybody's heard of
that, huh?

MR. KORESH: Okay, and for ever since
mariners since the beginning of time even through
ancient China and all that they've always talked about
the great sea dragons, right?

JOHN: Um-hum.

MR. KORESH: Well, once upon a time in this
world --

JOHN: Of course, some of us think that
those may have been giant squid and they have been
other things also, right?

MR. KORESH: That's what some think.

JOHN: Yeah.

MR. KORESH: But there's also records found
in the manuscripts of God.
JOHN: Um-hum.

MR. KORESH: I mean, surely a Christian is going to believe the Bible, right? Uh-huh.

JOHN: Certainly hope so.

MR. KORESH: Okay. Now, in the beginning Genesis tells us that the spirit of God, the (indiscernible) of Elohim, moved on the face of the waters. And of course when you look up into the Nebula of Orion you see a lot of gaseous material don't you? And that in a form that's, that's spirit. And God said, "Let there be light," and the origination of light is something that as we say before has its equity with darkness, you know, one is the same than the other, it's just they're on two sides of dimension just like you're on one side of the sun or the other side of the sun, there's always one dark side of the moon isn't there where light shines and where light doesn't shine? But anyway, without getting into the philosophies, let's just take a look here, and this is found in Job 38. "Then the Lord answered Job out of the whirlwind." Now, remember the whirlwind is just -- it's something that causes the atmosphere to spin around and around, right?

JOHN: Um-hum.

MR. KORESH: And says to Job, "Who is this that darkeneth counsel by words without knowledge?" A lot of, a lot of the things that men say they just say out of their feelings, they really don't know what
they're talking about. I'm sure you, you know about that. So God says to Job, "Gird up now thy loins like a man; for I will demand of thee, and answer thou me."

In Verse 4 God says to Job, "Where wast you when I laid the foundations of the earth? Declare, if those has understanding." I mean, you know, yeah, where was Job? In the mind of God? You know, I mean where did we come from? How did we originate? How do we have personality? How come we have individuality? Is there anything like us? Is there another equal to us?

"Who hath laid the measures thereof, if thou knowest, and who hath stretched the line upon it? Whereupon are the foundations thereof fastened?" You know, the world just hangs in space doesn't it? "Or who laid the corner stone thereof? When the morning stars sang together, and all the sons of God shouted -- " you know, sons, that's plural isn't it?

JOHN: Um-hum.

MR. KOresh: "Shouted for God -- for joy?"

(End Tape 112)
