(Tape 203)

UNIDENTIFIED MALE SPEAKER: Hello?

CHUCK: Yeah. This is Chuck Lucas.

UNIDENTIFIED MALE SPEAKER: Yeah, Chuck.

CHUCK: Testing the line.

UNIDENTIFIED MALE SPEAKER: All right. I read you loud and clear.

CHUCK: Great. Does this, does this sound better than it was before?

UNIDENTIFIED MALE SPEAKER: Yeah. Well, to me it sounds louder or maybe you're just talking louder.

CHUCK: Well, maybe I'm talking louder.

What was the complaint before, there was a buzz on the line or static?

UNIDENTIFIED MALE SPEAKER: Yeah, static, like a bad plug in the, in the handset or, you know, --

CHUCK: Okay.

UNIDENTIFIED MALE SPEAKER: -- in the connection or wall.

CHUCK: But, but this is intensely better, right?
UNIDENTIFIED MALE SPEAKER: Yes.

CHUCK: Okay, 10-4. We'll probably make one or two more calls before we finish up to test this out.

* * * *

UNIDENTIFIED MALE SPEAKER #1: Hello?
UNIDENTIFIED MALE SPEAKER #2: Hello?
UNIDENTIFIED MALE SPEAKER #1: Static on the line.

* * * *

DEC: Right, or I heard a voice and I just assume it was --

STEVE: That, that was David.

DEC: Oh, okay. Well, I, you know, --

STEVE: He's a tenor.

DEC: It was all garbled and, you know, and then it was all crinkly and crackly.

STEVE: But he can also sing base. Hey, so, --

so, --

DEC: He can?

STEVE: -- what happened with -- I thought they were going to get back to me about dropping off a line or something.

DEC: My understanding was that the phone people are on their way out there.
STEVE: Oh, okay, so they're still working on it?

DEC: Right. Henry just left a few minutes ago and the phone people are on out there -- heading out there with the lines. I mean, you know, that will take probably a few minutes, but --

STEVE: Okay.

DEC: -- we'll probably get a call back here when they arrive. I know they tested the line once.

STEVE: Right. And theirs was okay, huh?

DEC: Yes.

STEVE: We tested it from this side but now, again, we're having -- he was trying to call through. We've been trying to call through. It's -- it was totally dead. Then it crackled. Then, finally, now I can hear you okay or at least somewhat okay.

DEC: Yeah, it sounds pretty good now.

STEVE: I don't, I don't understand what's going on myself.

DEC: Well, they were going to test the line at different places, I guess, --

STEVE: Okay.

DEC: -- and then get a line out to you to crank into your phone again.

STEVE: Hello, hello?
DEC: Yeah.
STEVE: Is that your's?
DEC: No, I think it must be your line.
STEVE: Well, I'm not even moving here.
DEC: Huh. Well, there's, there's some glitch there, Steve, somewhere.
STEVE: There's an extreme -- right now there's a clicking going on.
DEC: Yeah, that's, that's probably on your end because like when I answered the phone, --
STEVE: I'm looking out the door right now or at least toward the door 'cause I wanted to see if there's any dogs or anything else near or on the line or chewing on it.
DEC: Sure.
STEVE: I know -- hello?
DEC: Yeah, still here.
STEVE: Yeah, in the past we've had problems when it rains, even with the regular telephone lines, even long before this.
DEC: Yeah.
STEVE: So, I mean --
DEC: And that might be part of the problem.
But they're supposed to be on their way out there.
That was what Henry told me and he just left a few
minutes ago.

STEVE: Okay.

DEC: You hear that again, huh?

STEVE: Yeah, right.

DEC: Well, --

STEVE: So, I'll just wait until he gets --

do you want -- do you have any -- did they get the
letter, by the way?

DEC: Yes. They just brought a copy into us
probably five, six minutes ago.

STEVE: So, you read it?

DEC: Well, I'm still -- I started. I'm
like on the second page and --

STEVE: Just started, on the second page.

DEC: -- we had the phone call and I had --

another phone rang and --

STEVE: David wanted to give his
appreciation for your, you know, I mean the
cordialness of exchange and so forth.

DEC: Uh-huh.

STEVE: Hello?

DEC: Yeah, still here.

STEVE: Of course, you know, we had hoped
that you would have turned off the sounds during that
hour at least but I, I know you were having troubles
getting ahold of the commanders and --

DEC: Well, I got in, in here after that and

Henry told me that that was a request and that, you

know, he said he didn't know the status of it out

there on the other end --

STEVE: I see.

DEC: -- by the -- by your, your compound

there.

STEVE: Dec, let me tell you, that which --
you haven't gotten to the last page but wait till you

see the last pages. I'm -- I can't emphasize enough

how extremely serious it is.

DEC: Uh-huh.

STEVE: The thing about the Lake Waco area,

Old Mount Carmel being shaken, about the dam being

burst, guaranteed, guaranteed, that is serious.

DEC: Okay. I, you know, --

STEVE: Anytime in the past that he's ever

shown or said anything of that nature always comes,

always has.

DEC: Okay.

STEVE: Never did he -- he's not the type --

he's never been a doomsday sayer or a profit, none of

that kind of thing, I've -- six and a half years that

I've known him. It is extremely serious.
DEC: Yeah. I haven't gotten that far. I'm lifting up, --

STEVE: Okay.

DEC: -- looking about Lake Waco area and Old Mount Carmel --

STEVE: The last page, last paragraph.

DEC: -- will be shaken. Yeah, okay.

STEVE: That's it.

DEC: I mean where -- is there a time frame on that?

STEVE: Time frame on that? Has -- the time frame hasn't been shown.

DEC: Uh-huh.

STEVE: Did you know -- did you hear though on the news -- he came and told me about it and then right after that is when Austin was hit with a small one. Then up north, also, there was another area that was hit with an earthquake.

DEC: Uh-huh. I wonder where that --

STEVE: It's definitely moving up, seriously. Yeah, Austin was. Not maybe, it was on the news.

DEC: Yeah, okay.

STEVE: And that was after he showed it to me, read it to me and then wanted to, to get out to
you people.

DEC: Yeah. Well, you know, obviously, what we'd like is for you all to come out of there before any earthquake --

STEVE: Dec, it's so serious. Dec, listen, if that God shows them those kind of things that we're finally in the days -- remember, whether you believe in the Bible or not, if it's -- now, look at -- all the science of the worlds believes there was a great deluge 5000 years ago, --

DEC: Right.

STEVE: -- somewhere around there.

DEC: Uh-huh.

STEVE: But, anyway, the great flood. And what it shows -- even in that day, it was a bright, sunny, beautiful day, like any other day, when finally black clouds started rolling in and all the rest. It's going to be that way. Christ said in Matthew 24 in the final days. I know you don't buy it. It's another beautiful day in the neighborhood.

DEC: Right. Well, I mean, you know, I --

STEVE: If you only knew the book. If you only knew what all these prophets had to say. They died with their testimony intact. It's come down. Everybody's got a copy of the book these days. It's
there for you and I to check, to judge. The truth is to be judged.

DEC: Uh-huh.

STEVE: And pro-- give, you know, give the guy a fair chance, Dec. I mean in honesty, I mean religion is political, religion is life.

DEC: Steve, I'm trying to sit here and be impartial.

STEVE: I know you are. I know you are. That's great. I'm glad you are.

DEC: We're, we're here and we're trying to facilitate everybody coming out safely and --

STEVE: Oh, I hate that when you say that because, you know, our thoughts are number one, God first. And when we appreciate, you know, your perspective and, and working that out with you, there's not a problem here with any individual that way, none whatsoever.

DEC: Yeah. All right. Well, --

STEVE: Yeah, in fact, like David says, we've always loved you guys, you know. I mean seriously. I mean finally the day comes where you and I, everybody's got to give an answer. It's time to stop our foolish nonsense and see what God's got. And either you're going to live forever or it's going to
end for you.

    DEC: Well, none of us are going to live
forever. You know that as well as I do.

    STEVE: Oh, no, yeah, we are. No, you can.
There's no reason --

    DEC: Spiritually we may later on but --

    STEVE: Well, that shows that you don't
under -- see, we can -- right now David has the
ability the show you physically, spiritually, how
that's going to be. I'm talking about matter,
antimatter, the physics of it.

    DEC: Uh-huh.

    STEVE: Now, you would never know unless you
took a little time to hear and then you judged it, you
evaluated it.

    DEC: Yeah.

    STEVE: But it's serious. It really is
serious.

    DEC: Well, you know, --

    STEVE: That's true. If you don't care
about spiritual things, it'll never benefit you
anyway, if you either haven't or you don't now.

    DEC: Yeah. I see someone here -- yeah,
somebody handed me this note, said that, you know, we
don't want to lose sight of --
STEVE: Like, you know, --

DEC: This situation is not going to go away, you know.

STEVE: No, no, and that's --

DEC: We're not going to go away, Steve, and --

STEVE: No. All the problems that we have, it never came by the political realm. It, in fact, came by religious, religious leaders, those that did not want to hear because they were making money off the masses. They were getting a name. They had followings and so forth. David has never wanted that. He's always wanted the truth to get out, that people might judge the truth, not the bearer of the truth. That's why you have a book called the Bible. It gives nothing but a history lesson of what happens to people that judge those that bear the truth. I mean we're all -- the book shows that everybody's -- all are sinners. Everybody's come short of the glory of God. But I mean this is a serious time, it really is. It can't be emphasized enough. I'm just a little mortal man here mouthing a few words. A lot of -- billions have come before me but finally the book is open. How do you know for sure? Well, take the time to hear. I mean don't worry about me coming in and out. I'm, I'm
coming out. I said I would, they all said they would.

DEC: Well, I'm -- that's --

STEVE: But I'm concerned --

DEC: I like to hear that.

STEVE: Well, it's true. But we're -- the whole reason why this has come about and that the circumstances are here is for men to be, be quiet and to hear and to judge 'cause now is the day and the time to do that. There's --

DAVID TO STEVE: We're the victims right now, they're not the victims.

STEVE: Yeah, that's right. We're the victims right now, of course. You know, you're not the victims.

DEC: Well, you have to come out and straighten that out, Steve. You know that as well as I do.

STEVE: This is correct. This is correct.

DEC: Sure. Sure.

STEVE: And we have not, you know, changed from that position or that stance.

DEC: Yeah.

STEVE: We've said that right along.

DEC: Yeah. Who, who wrote the letter?

STEVE: That, that -- the letter was written
by Judy.

DEC: Judy, okay. 'Cause we were kind of looking at this and John -- what are you, John-5?
Yeah, --

STEVE: David, David dictated it --

DEC: I see.

STEVE: -- word, word for word.

DEC: Okay.

STEVE: There's nothing that's there that wasn't dictated by him.

DEC: Yeah. 'Cause we just kind of surmised it was feminine writing and --

STEVE: You know, I'm going to tell you for a fact, he does not even -- he does not breathe when he's doing that. I'm serious. You can get a doctor sometime if you want and bring one in here and -- it's true.

DEC: Uh-huh.

STEVE: It's a strange, strange thing.

DEC: Yeah. How's -- speaking of Judy, how's her finger?

STEVE: Her finger?

DEC: Yeah.

STEVE: It's -- that's an -- she's going to leave it behind with the rest of her one day soon.
DEC: What, what does that mean?

STEVE: Well, Dec, you know, I mean you -- you're --

DEC: She's going to leave it behind with what -- I mean is she fixing to die or --

STEVE: -- you're talking about -- well, you know, I'm trying to get you guys to one realm and you're talking about the here and the now which --

DEC: That's right. I'm concerned about the here and the now.

STEVE: Yeah, but like it was in the days of Noah. It was a nice, beautiful day that day, too, Dec. It really was.

DEC: Yeah. Well, I'm --

STEVE: A beautiful day. Six thousand years later -- you don't -- you and I don't know what beauty was as it was in those days. Now, after 6000 years of --

DEC: Life was pretty bad back then.

STEVE: -- degeneration and degradation.

DEC: Yeah, yeah. Well, what's --

STEVE: I -- let me ask you if you know anything of this information, do you remember or do you know when the earthquake took, took place there in Turkey, Mount Ararat and the Ark was discovered? Are
you aware of that?

    DEC: No. I -- it's sometime in the past.
    STEVE: It is, is right.
    DEC: I don't remember exactly when it happened.
    STEVE: You don't remember exactly?
    DAVID TO STEVE: They'll just find out -- count the years and see how it was, but gives us today.
    STEVE: Find out and give us the exact time, how many years it's been since then. It's important that you know that.
    DAVID: I know but (Indiscernible).
    STEVE: David knows but --
    DEC: Is this the history quiz for --
    STEVE: No, no, no.
    DEC: -- for the day, Steve?
    STEVE: But it's really -- it's important for you. It really is.
    DAVID: It's an omen, it's a warning to this generation.
    STEVE: It's a warning to this generation.
After thousands of years the Ark, as you know, was finally found. They finally discovered it.
    DEC: Yeah.
STEVE: Atheist speak -- historians would not acknowledge anything to do with that, any portion of the Bible, especially that because it blows away the theories of evolution. Hello?

DEC: Yeah, I'm still --

STEVE: Here we -- oh, brother, --

DEC: Here we go again. Right.

STEVE: Yeah, this is weird. I don't quite understand what's going on here.

DEC: I don't either but it's -- it's not on this end 'cause I jiggled all the connections we have here.

STEVE: Well, see, you know, as far as, you know, I told them we'd go out so far from the building and as far as we tested, it was okay, also the line.

DEC: Right.

STEVE: But it could be -- I don't know, you know, after that, I'm not certain.

DEC: Yeah. They're supposed to be getting it --

STEVE: Yeah, I just about lost you there.

DEC: Supposed to be getting that line out to you, Steve.

STEVE: Okay. Okay. I expect to see him here anytime now.
DEC: Okay, Steve, --

STEVE: Yeah.

DEC: -- one of the radio -- telephone guys just came in and said that he's received word they're, they're ready to put up the line but we have --

STEVE: Okay.

DEC: -- to shut this down on this end here.

STEVE: All right.

DEC: You have to hang up your line.

STEVE: Okay, I'll do that.

DEC: All right. We'll try and get back with you later on.

STEVE: Well, Dec, talk to you in a little bit.

DEC: Okay, bye.

STEVE: Okay, bye.

* * * *

DEC: -- new line out there.

STEVE: Okay.

DEC: But he said they haven't put it in yet.

STEVE: Okay. How much time because I'll kind -- I'll have somebody keep an eye open. And as soon as a Bradley comes to the bend or wherever else -- if they want to drop it off, I'll walk over there
and get it.

DEC: Is, is the Brad -- hold on just a minute, Steve.

STEVE: Okay.

DEC TO OTHERS: Is the Bradley going to deliver it up there?

UNIDENTIFIED MALE SPEAKER: Right, but you tell him the cable's coming in and there's a piece of paper with the cable. You got the same piece of paper.

DEC: Okay, Steve?

(Dial tone).

* * * *

(Phone continuously ringing)

UNIDENTIFIED MALE SPEAKER: They may be screwing with us. I mean they may be screwing with us.

(Phone continuously ringing)

UNIDENTIFIED MALE SPEAKER: Another call.

(Phone continuously ringing)

* * * *

JIM: This is the phone man.

UNIDENTIFIED MALE SPEAKER: Hey, phone man.

JIM: I want to know -- what we did is we cut the, the heavy duty wire away from the drop line
that goes into the compound. The compound's not on here right, now, okay?

STEVE: Hello?

DEC: Steve?

STEVE: Yeah.

DEC: Dec again.

STEVE: What, what happened because --

DEC: I don't know.

STEVE: How were you able to even ring through because I picked it up for the -- every couple of minutes in the last -- since I talked to you last and --

DEC: Let me -- hang on.

STEVE: Okay. Are you sure it's not your end? Hello? Hello? Hello?

DEC: Hello?

STEVE: Yeah, okay. Man, --

DEC: Yeah.

STEVE: -- now this is as clear as can be.

DEC: Yeah, okay.

STEVE: What, what are you guys doing?

DEC: Our guys are trying to run another line out there.

STEVE: But how come this is so clear now?

DEC: I -- Steve, I have no idea unless --
STEVE: I'm sitting right by the phone. I haven't gone anywhere. No one's touching the lines, the phone.

DEC: Well, for a second I thought maybe you were playing games with us and messing with that line there.

STEVE: Not in -- no, not in the least.

DEC: Yeah.

STEVE: You were talking and saying how good the line and all of a sudden it went totally dead.

DEC: I know. Yeah, we were talking and it finally went dead but let me -- I'll tell you what I'm going to do. Let me hand off the phone here for a minute, --

STEVE: All right.

DEC: -- Steve. We've got a, a telephone guy here that certainly knows more about wires --

STEVE: All right.

DEC: -- and pliers that I -- than I do.

STEVE: Okay.

DEC: And maybe he can direct you with this, this hookup for the, the line or something.

STEVE: Sounds good.

DEC: Okay. Hold on.

STEVE: All right.
DEC: It's Jim, right? This is Jim.

STEVE: Okay.

DEC: Okay.

JIM: Hi, Steve, how ya doing?

STEVE: Hello, Jim, how are you?

JIM: Oh, I'm fine.

STEVE: Good, good. So, what do we have now?

JIM: Well, what we've got, Steve, is a whole separate line coming into you, a different line.

STEVE: Okay. Okay.

JIM: And it's, it's beige in color.

STEVE: Okay.

JIM: And on the end of it -- what we think is happening is the -- the best we can analyze it from what you're telling us this morning --

STEVE: Right.

JIM: -- and from what we've tested with the phone company, is that there may be a short close to where you folks -- we're not really sure how you tapped into the telephone line, how you got your phone working off of the line that was dropped in there.

STEVE: Well, Jim, I don't understand why it's so extremely clear right now. I mean there's no crackling. There's nothing.
JIM: Well, I could tell you why right now, --

STEVE: Oh.

JIM: -- because right now what we're doing, we're pumping extra voltage down the line.

STEVE: Oh, I see, I see, okay.

JIM: And what that's doing --

STEVE: Yeah, yeah, I got ya.

JIM: -- that's jumping over the potential short that's leaning.

STEVE: I see, okay.

JIM: So, but we can't keep doing this because it will overheat your instrument.

STEVE: I got it, got it.

JIM: All right.

STEVE TO DAVID: Right now he's as clear as can be but he can't -- they're pumping more voltage and it will overheat the instrument. So, there's still a crackling, a break somewhere in the line. Okay.

JIM: So, what we're, we're doing right now is we're preparing to drop another line in there and on the end of this line is a telephone connector.

STEVE: All right.

JIM: It's got four screws. There's four
wires hooked up.

    STEVE: Okay.
    JIM: Now, we're going to talk you through them right now.
    STEVE: All right.
    JIM: Along with this telephone connector is a piece of paper.
    STEVE: Okay.
    JIM: Now, I've got a Xerox in front of me of this piece of paper.
    STEVE: All right.
    JIM: Now, it's got four terminals on it and on the block you'll see a "G", that stands for green; an "R", that stands for red.
    STEVE: For red, okay.
    JIM: A "B", that stands for black.
    STEVE: Blue -- black, okay.
    JIM: And a "Y", that stands for yellow.

Now, this is all laid out on this piece of paper that's coming in to you.

    STEVE: Okay, sounds good.
    JIM: Now, all we want you to do is -- it's -- we think it's important that you take this little block -- now, it's got a piece of metal on the end.
STEVE: Okay.

JIM: And it's got double stick tape on it with a protector on there.

STEVE: Right.

JIM: Peel along this piece of paper and you'll feel the adhesive on it.

STEVE: Okay.

JIM: We need that. Just put it anywhere you feel comfortable putting it as long as it's stationery because we think that's where the short is --

STEVE: I see.

JIM: -- on the end.

STEVE: Okay.

JIM: It's sort of swinging out there. Anytime you --

STEVE: So, it will be on the end of -- it will be on the end of a line and we should bring it into the building somewhere where it will be stationery?

JIM: Right.

STEVE: Okay.

JIM: Because it's all exposed, because we don't want you to think -- like you mentioned this morning, --
STEVE: Right.

JIM: It's, it's, it's dry in there. It's, it's out of the elements.

STEVE: Okay, good, good.

JIM: We don't want to -- we don't want to cause any problems here.

STEVE: I think there -- is there a Bradley coming up right now? Could this be the one now? I hear one coming by.

JIM: Well, they're in the area. And when we're doing talking right now, what we're going to do is we're going to cut the line we're on, --

STEVE: All right.

JIM: -- reconnect it to this, drop the voltage down, --

STEVE: Okay.

JIM: -- the normal voltage.

STEVE: All right.

JIM: Reconnect it to the other line and hand this thing into you, okay?

STEVE: Okay, sounds good.

JIM: And this way there's, there's no covers on it. It's all exposed. You can look at it. You can analyze it.

STEVE: All right.
JIM: It's there.

STEVE: Okay.

JIM: And all -- there's -- all we -- all you need to hook up is a screwdriver.

STEVE: Got it.

JIM: And the instructions there will read on the top of this piece of paper, hook your telephone to the green and red screws.

STEVE: It will be -- it's, you know, -- usually, it's self-explain or just looking at it.

JIM: Right.

STEVE: Okay.

JIM: And believe me, the cables are colored. Okay, the cable's coming in --

STEVE: All right. Well, that will make it very simple.

JIM: Green to green, red to red.

STEVE: All right.

JIM: And we're going to see -- now, the only problem that could arise, okay, --

STEVE: Okay.

JIM: -- is the fact that you may not be able to access dial tone. And that's no big deal because if we don't -- well, we'll call you and we're going to test this to see if you can dial out, okay?
STEVE: All right.

JIM: If you can't, you can tell your telephone man that you've got in there that we're going to reverse polarity at the pedestal --

STEVE: Okay.

JIM: -- in the front of your compound there.

STEVE: All right.

JIM: We're going to handle all that, okay?

STEVE: Okay.

JIM: All we want you to do is hook your green and red wires to it and away we go.

STEVE: Sounds good.

JIM: Now -- all right?

STEVE: Okay.

JIM: Now, we got all -- we've got -- this should work just fine for you.

STEVE: Okay.

JIM: All right. As long as we -- you take your screwdriver out and you clamp those two down, --

STEVE: -- we'll do it all.

JIM: -- it will work.

STEVE: Okay.

JIM: So, now, --

STEVE: So, the next step, the guy's
bringing the cord, now what?

    JIM: Well, the next step's going to be that we're going to get the cord out there.

    STEVE: Okay.

    JIM: Now, there's also a package coming into you.

    STEVE: Okay.

    JIM: It's a -- I believe it's a, a prayer book somebody requested or somebody sent to somebody in your compound.

    STEVE: Oh, someone is sending a prayer book into the compound?

    JIM: I guess. It's, it's in a language that we really don't understand.

    STEVE: Really? Like Hebrew or something?

    JIM: Right. That's going to be dropped off there, too. It's in a brown paper and you can --

    STEVE: Brown paper.

    JIM: Again, it was important that it get into you for some -- somebody's mother sent it to him, I guess. I was just told --

    STEVE: -- mother sent --

    JIM: There's a name on it.

    STEVE: Who, who is that, Jim?

    JIM: I have no -- I can go find out for you
if you want --

STEVE: No, no, no, no, that's okay.

JIM: If you want to talk to the --

STEVE: No, that's okay. Are you with the FBI yourself or --

JIM: Right, I am.

STEVE: Hello?

JIM: Yeah, we got problems here now so --

STEVE: Okay.

JIM: -- we're going to terminate this but I'll tell you what, --

STEVE: All right.

JIM: -- we'll, we'll call you back --

STEVE: Okay.

JIM: -- when we're hooked through.

STEVE: All right.

JIM: And then we'll see if it's working.

STEVE: Hey, I'm losing you.

JIM: Yeah. We got -- the static's back.

We're going to have to drop that voltage. That phone -- is that phone getting warm on you?

STEVE: No.

JIM: Oh, okay. All right.

STEVE: Okay.

JIM: Good. Bye.
STEVE: Good-bye.

* * * *

UNIDENTIFIED MALE SPEAKER: Yes, sir.

(Phone continuously ringing)

JOHN: You are --

STEVE: I don't give a damn what you want, John. Now, it's going to stop here and now. You --

JOHN: Steve, I don't think you realize the position you're in. Let's not lose sight of what's going on out there, guy.

STEVE: When they do that kind of thing, I can't -- listen to me, John. I'm going to put the phone down and you don't talk to me again.

JOHN: Steve, Steve, Steve, --

STEVE: Now, when these guys say things like that when I've been decent to them --

JOHN: -- you're not going to hurt me. Are you threatening me, Steve? This is not your style.

STEVE: If they want to do this out there, I can't stop the reaction of what will happen back to them. Now, do you hear me?

JOHN: Steve, you're out of control.

STEVE: I have sent you a letter. I passed out a letter today for all your people to hear and to read. That is extremely serious, John. And if you
haven't had a (indiscernible)

JOHN: That's what we're trying to figure out, Steve. That's what we wanted to talk to you about.

STEVE: I would suggest to you that you get your Bible out and that you read it very carefully. It's a serious thing. And what's on that letter will happen.

JOHN: Steve, I think you had a little too much sugar on the Fruit Loops this morning, guy. You're swinging out. Now, relax now.

STEVE: Do you have to be a smart ass yourself, John, do you have to be?

JOHN: Steve, I'm trying to get control of what you're saying.

STEVE: You're not going to get control when you're interrupting me. You're going to listen to me when I'm through or you and I don't talk.

JOHN: Well, Steve, you'll have to think this out, Steve, and give us a call back when you're a little bit under control, okay?

STEVE: (Indiscernible). You get yourself -

(Phone hung up)

* * * *
UNIDENTIFIED MALE SPEAKER: One ring and that's it.

(Repeated dialing and busy signal)
UNIDENTIFIED MALE SPEAKER: I guess both Wayne and David's are busy.

(Repeated dialing and busy signal)
(Phone continuously ringing)
JIM: Hello?
BYRON: Hello.
JIM: Who's this?
BYRON: This is Byron Sage. Who's this?
JIM: God damn, Byron, this is Jim, Jim Patricia (ph). Did you just ring in?
BYRON: Yeah.
JIM: Yeah, I was hanging on the line. Boy, you hit me good, pal.
BYRON: Oh, sorry about that.
JIM: You owe me a favor.
BYRON: How long do you want us to hold off?
JIM: Until we hit you on the radio, okay?
BYRON: Good deal.
JIM: Yeah, I just -- I was -- I'll talk to you when I get back, boss.
BYRON: I'll owe you one.
JIM: He says you're lucky you have four
teeth. Bye, now.

BYRON: Sorry, bud.

* * * *

BYRON: Hello?

STEVE: Hello?

BYRON: Hello? Are you still there?

STEVE: Yeah, still here.

BYRON: Geez. This is, this is a horrible - - lot of feedback.

STEVE: Yeah. What happening -- well, is it on your end? It must be.

BYRON: I'm thinking that --

STEVE: There it is.

BYRON: -- most of it is here, yeah.

STEVE: Okay. Who am I speaking to?

BYRON: This is Byron.

STEVE: Byron.

BYRON: How ya doing, Steve?

STEVE: Not too bad. Right now -- it was, in fact, a pinched line. When I stapl-- what I don't understand, I stapled it yesterday and it worked all the way through and then, of course, this morning it was dead as can be but that's what it is. Just opened up the door and --

BYRON: So, there must have been a staple
through the line?

STEVE: Well, it wasn't through it. It's, you know, I actually put the staple around the, the line itself but apparently in doing that, it squished some of the line or some of those fine wires together.

BYRON: Oh, okay.

STEVE: And what we're going to do, I'm going to reach my hand out the window which is just before the door and pull the line in through that way so it won't get pinched by the door anymore.

BYRON: Okay. Okay. So, you're going to --

STEVE: And then, and then I'll call you right back.

BYRON: So, you're going to disconnect the phone at this point in time?

STEVE: Yeah, just, just for a few minutes. What we're going to do is pull it through so I don't want it to get pinched by the door anymore 'cause that was part of the problem.

BYRON: Good.

STEVE: Okay.

BYRON: The, the dogs aren't jumping up and on it, are they?

STEVE: No, not this time but they were that one day, though. There were two point -- places they
had chewed on. I think it was a little white puppy that we had.

BYRON: Right. Right.

STEVE: Yeah.

BYRON: I saw the thing -- I was sitting out there in one of the Bradleys. I think it was the first day that the attorney went in, --

STEVE: Oh, okay.

BYRON: -- that DeGuerin went in and that --

STEVE: Yeah.

BYRON: -- dog, I'll tell you, he must have spent two, three hours doing nothing but gnawing on your -- on one of the rugs out there.

STEVE: I believe it. I believe it.

BYRON: Go ahead and, and fish that through.

STEVE: Okay.

BYRON: I'll let the -- I'll let the guys up forward know what's going on.

STEVE: Okay. I'll call you right back.

BYRON: Good deal.

STEVE: Okay.

BYRON: Bye.

* * * *

(Phone continuously ringing)

MARGUERITE: Hello?
BYRON: Hi.

MARGUERITE: Hi.

BYRON: This is Byron Sage. Who's this?

MARGUERITE: This is Marguerite. Hello?

BYRON: Marguerite?

MARGUERITE: Hello?

BYRON: Hello?

MARGUERITE: I don't know why we got a dialing tone here, too.

BYRON: Yeah. Is Steve around?

MARGUERITE: Steve is on the other side of the building. Can I go run and ask him to call you back then?

BYRON: Yeah. Are -- can you hear that click?

MARGUERITE: I do. It's terrible.

BYRON: Okay. Can you ask him to give us a -- back.

MARGUERITE: Okay.

BYRON: I need to talk to him.

MARGUERITE: All right. -- to the other building, call him.

BYRON: Okay.

MARGUERITE: I'll get --

BYRON: Bye-bye.
That worked.

* * * *

(Busy signal)

STEVE: Hello?

BYRON: Hello, Steve?

STEVE: Yes.

BYRON: This is Byron Sage again.

STEVE: Byron, how is it?

BYRON: Good. Well, it's -- hello, Steve?

STEVE: Is that your line? It must be.

BYRON: -- go again. I thought we had this resolved.

STEVE: It's crack-- it's clicking like, in and out.

BYRON: Yeah.

STEVE: Yeah, I'm talking to Graham here. Now, is that my line or yours?

BYRON: Well, we're not doing anything here.

STEVE: Me either. I'm just sitting here by the phone and then, you know, the line has gone through the window, over the door and by a table. That's where I'm sitting.

BYRON: Did you change it at all when, when you brought it in through the window? I was hoping that would correct things.
STEVE: Okay, now he's, he's touching it on a -- do that again, Graham. It doesn't seem to make any difference. Just a minute, let me -- he's, he's looking at it now. You know that little box, he put it on the wall to be stationery. Hello?

BYRON: Yeah, I, I can hear you.

STEVE: Yeah. And just to make sure there's no movement ever or anything and he's looking at it right now. It, it's kind of like clicking at intervals almost.

BYRON: Do you know what a floating short is?

STEVE: No, I really don't.

BYRON: Okay. I think I served in the service with this guy but one of the tech guys who -- something about a floating short. And I think that's what we were talking about yesterday with --

STEVE: I see.

BYRON: -- the, the wires moving at all.

STEVE: Okay.

STEVE TO GRAHAM: Have you heard of a floating short, Graham.

GRAHAM: A floating short?

STEVE: Yeah. I guess he has.

BYRON: He has? Well,
STEVE: Well, let me put -- let me put him on with you just for a moment.

BYRON: Good. Okay. Well, I'll try to get one of our tech guys in, too.

STEVE: Okay. Here's Graham.

GRAHAM: Hello?

BYRON: Hello, Graham?

GRAHAM: Hello, Byron?

BYRON: Yeah, this is Byron. Can you hear that clicking?

GRAHAM: Yeah.

BYRON: Do you have -- do you have any -- I don't know the first thing about, about the phone lines or anything.

GRAHAM: Yeah. Just let me change this phone and the phone line I've got at the moment.

BYRON: Okay.

GRAHAM: I'll put that line into the plug we've got at the moment.

BYRON: Okay.

GRAHAM: I'll just be a second.

BYRON: All right. I'll stay on the line, huh?

GRAHAM: Okay, then.

* * * *
UNIDENTIFIED MALE SPEAKER: Let's let him -- let him call back.

BYRON: Hello?

GRAHAM: Hello, Byron, it's Graham here again.

BYRON: Yeah, Graham.

GRAHAM: We've still got it, haven't we?

BYRON: Yeah, we still have it. I just -- I called for one of our phone people --

GRAHAM: Yeah.

BYRON: -- and he mentioned something about -- let's see. Apparently, what they introduced that into -- because we could hear perfectly yesterday.

GRAHAM: Yeah.

BYRON: There must have been a -- they had mentioned something about a, a box or a block that they had put in there with a resister that would keep the static out.

GRAHAM: Yeah.

BYRON: Do you still have that on there?

GRAHAM: Oh, we did change the, the block. Hang on.

BYRON: And he also said something about insuring that, that the, the wires are between some
washers and tightened down real tight to keep the static out.

GRAHAM: Yeah. What did I do with that little box 'cause I had to change the box. I had to -- I put it -- originally it fixes onto the wall and because we have to change it, I, I pulled it out and put it to another box. If you'd like, I, I could have a look at the other box and then change it back again.

BYRON: Well, whatever. I wasn't here last evening but I was told that the other one that went in apparently that the wire -- I don't know if there was a, a short in the wire or what but that it was a real poor connection right at first.

GRAHAM: Yeah, yeah. That's what I understand also.

BYRON: Do you still have that other one?

GRAHAM: Yeah.

BYRON: Okay. Maybe we could -- maybe you can try to get it back on the line and we'll see if that makes a difference.

GRAHAM: Yeah. Well, I'll, I'll, I'll do that and call you back, okay?

BYRON: Okay. That'll be fine. I'll be right here.

GRAHAM: Okay, then bye.
BYRON: Okay. Thanks, Graham.

* * * *

BYRON: Hello?

GRAHAM: Hi, Byron, it's Graham again.

BYRON: Yeah.

GRAHAM: Let's just check the line.

BYRON: Okay.

GRAHAM: Does that sound better?

BYRON: Yeah, I, I think it does.

GRAHAM: (Indiscernible) that clicking.

BYRON: And here we go again.

GRAHAM: Was that a click?

BYRON: Yeah. We -- went dead for a second.

There we go again.

GRAHAM: Well, it's not as bad as it was.

Hang on.

BYRON: Now I'm still hearing it, Graham, are you?

GRAHAM: Yeah. Trying to find where it is.

It could be a -- has some sort of a short around somewhere but I don't see it.

BYRON: Did you used to work for the telephone company or something?

GRAHAM: Sorry?

BYRON: I said you must have worked for the
telephone company.

GRAHAM: Not quite. I'm just examining the rest of this line 'cause it could have another kink in it somewhere and that's where it could be where it is.

BYRON: Okay. Were you opening a window by any chance just a little while ago?

GRAHAM: Yeah, we did. Well, we just put a little -- what do you mean (Indiscernible).

BYRON: Okay. 'Cause somebody came in and said that, you know, that some -- that you had been opening up some windows or something. They wanted to know what was going on. We told them you were working on the line.

GRAHAM: Well, you know, this window out, just beside the front door here, I, I did put my hand out and pull in a line or at least somebody else did. I don't --

BYRON: Okay. We told them we thought it was in relation to working on this.

GRAHAM: Yeah.

BYRON: When it's not popping, it's, it's clear as a bell but, you know, it seems like about half way through a conversation you end up getting a lot of static.

GRAHAM: Yeah. We did pull in -- well, I
did cut off about -- I think it was about eight feet of line which we, you know, which we did staple and I think I got out everything -- possibly cause any --

BYRON: Steve had mentioned something before about a, a staple maybe going through the line.

GRAHAM: Yeah. We -- line, he put a staple through the -- we've cut out that, that entire section of the line so --

BYRON: Hum.

GRAHAM: -- that shouldn't have been a problem.

BYRON: What's -- do you know what an RJ-11 block is?

GRAHAM: RJ-11 block?

BYRON: Yeah.

GRAHAM: Not, not familiar, no.

BYRON: Okay. I'm not either. One of the guys mentioned that apparently they had, they had put in some sort of a, a -- that box that they were referring to that was supposed to have the resistor in it --

GRAHAM: Yeah.

BYRON: -- to keep the static down. I guess that's an RJ-11 block. Like I say, I don't know anything about it. Did, did you rehook that, that
junction box or --

GRAHAM: Yeah.

BYRON: -- maybe that's the RJ-11.

GRAHAM: Yeah. Well, the, the box that I sent in -- would you mind if I, I just reconnected a couple of lines again? I just want to check, check them again and I'll give you a call back.

BYRON: Sure, sure.

GRAHAM: Okay?

BYRON: Yeah. Hold on just a second. Okay.

Okay. One of the guys said are you sure that, you know, this isn't -- I don't know anything about this stuff but he's saying to make sure that you've got black hooked to black and red to red and I guess that's the color of the lines coming in?

GRAHAM: Well, I, I didn't hook, hook the black and the yellow on yet. I left those, those off because we don't think we -- we're using those lines. We just -- the red and the green line.

BYRON: Okay. Apparently, they're, they're grounds or something as well, one of the, the phone guys are telling me.

GRAHAM: Oh, they should have been ground?

BYRON: Yeah. You might want to hook them back up and we'll see if it works.
GRAHAM: Okay, then I'll try that.

BYRON: Okay, 'cause this, this will drive you batty.

GRAHAM: Okay, then.

BYRON: Okay. You're going to give me a call back?

GRAHAM: Yeah, I'll do that.

BYRON: Okay. Thanks, Graham.

GRAHAM: Okay, bye.

BYRON: Bye.

* * * *

BYRON: Hello?

GRAHAM: It's Graham again, Byron. I just -

BYRON: Keep your fingers crossed, I can hear you clear as a bell.

GRAHAM: Well, I hope it stays this way and no little clicks this time.

BYRON: Yeah, I haven't heard it yet.

GRAHAM: No. So, I hope things stay that way.

BYRON: Yeah, no, this is, this is perfectly clear from this end.

GRAHAM: Yeah. We've had a lot of problems. It's been an absolute nightmare for me and, you know,
ever since this thing started I've had, you know, it
troubles me at all hours -- trouble sleeping and
whatnot.

BYRON:  I know exactly what you mean.

GRAHAM:  Yeah.  And I, I can assure you,
one of it's been intentional on our part.  Just that,
you know, it's just being persistent.

BYRON:  Well, it sounds like you may have
gotten it fixed this time.  That sounds good.

GRAHAM:  Yeah.  Okay, then, we'll, I'll --
what I'll do is I'll get you Steve.  I think he's gone
off in the other part of the building.  So, I'll hang
up and I'll get him to call back -- you back, if it's
all right with you.

BYRON:  Yeah, if you would 'cause I need to
talk to him right away.

GRAHAM:  Okay.

BYRON:  Either, either Steve or David.

GRAHAM:  Okay, I'll do that.

BYRON:  Okay?

GRAHAM:  Okay.

BYRON:  Graham, I appreciate it.  You do
good work.

GRAHAM:  Oh, thank you.  We'll talk to you
again sometime maybe.
BYRON: Good. Hopefully, it will be face-to-face in the short term here.

GRAHAM: Yeah.

BYRON: Okay.

GRAHAM: Okay, then.

BYRON: You bet. Are you ready to come out by any chance? I'll be happy to talk to you today.

GRAHAM: I, I don't know what's happening today. I've, I've been outside, out with, with doing some different jobs such as this. So, you know, I'll -- I said, I'll, I'll get Steve on the phone for you.

BYRON: Good deal.

GRAHAM: Okay, then, Byron.

BYRON: Okay, thanks again.

GRAHAM: Bye.

BYRON: Bye.

* * * *

STEVE: Hello?

BYRON: Hello, Steve?

STEVE: Yeah. Byron, can I call you right back? I'm -- he's switching the phone now by the chair.

BYRON: Okay. Do you have somebody out on the roof?
STEVE: No.
BYRON: Okay.
STEVE: Uh-Uh.
BYRON: You might want to check because I understand we had some problems last evening when you came out and it wasn't coordinated and don't want to have a repeat of the same thing.
STEVE: Someone's on the roof?
BYRON: Somebody is on the roof. I'm not sure exactly where.
STEVE TO OTHERS: Could somebody do me a favor and check to find out if someone's on the roof and where.
BYRON: Well, let's get him in. Steve, I'll try --
STEVE: Yeah.
BYRON: -- to check from here and find out exactly where they are on the roof.
STEVE: Yeah, that will help a lot.
BYRON: They just, they just stuck their head in the door and said -- whereabouts on the roof, do you know? Okay. They're checking on it right now.
STEVE: Okay. Byron, I'm going to switch the phone here. Let me call you right back. It will be one minute.
BYRON: Good. Okay, I'll be here.
STEVE: Okay.
BYRON: Try to get him in as soon as you can.
STEVE: Pardon? Okay.
BYRON: He's back in, apparently.

* * * *

BYRON: Hello?
STEVE: Hello, Byron?
BYRON: Yes.
STEVE: Okay, now we got a good line.
BYRON: Geez, it's just as clear as a bell.
That's good.
STEVE: Yeah, finally.
BYRON: I hope it stays that way.
STEVE: Apparently, it was at our end still then, huh?
BYRON: What's that?
STEVE: Well, it must have been -- Graham, it was at our end then, huh?
GRAHAM: I think it was because it wasn't grounded.
STEVE: Oh, I -- he said it was because it wasn't grounded.
BYRON: Right.
STEVE: He -- what's his name said about the green and the red but --

BYRON: Okay. I think what they, what they said was, you know, that they had -- and I don't know -- I don't know anything about this stuff but they mentioned that they had doubled up the pairs to give you a better audio path or whatever that means.

STEVE: Okay.

BYRON: So, it's probably the grounding problem. But it's clear right now.

STEVE: Right.

BYRON: Did you find out who was out the window and what for?

STEVE: No, they're still, in fact, checking. No one even -- I mean they're like me, no one even knows anything about it.

BYRON: Okay. Well, apparently, they just stuck their head back in here and said they were back in but we need to make sure --

STEVE TO OTHERS: Did, did any -- huh? Just a minute.

BYRON: Okay.

STEVE TO OTHERS: What was he doing? Yeah, someone -- they just found out, someone did walk out there. And they asked him what he was doing. He said
just getting fresh air. What on earth?

BYRON: Exactly.

STEVE: I, -- and I know who it is even already. It's, it's a guy that does things like that now and then.

BYRON: Well, I'll tell you, --

STEVE: Good Lord.

BYRON: -- we'll be more than happy to, to give you all fresh air as soon as you want to come out.

STEVE: No, I know, I mean --

BYRON: We need to coordinate it, you know, so that --

STEVE: I know. I knew nothing about it but it doesn't surprise me who it was. I mean, you know, no one here is, is that way. Once in a while you get certain individuals here that, you know, they do things without your even knowing.

BYRON: It isn't Amen back in there, is it?

STEVE: Pardon?

BYRON: Wasn't Amen that got back in there, was it?

STEVE: No, just about.

BYRON: From what I've heard.

STEVE: How's Amen doing?
BYRON: I think he's doing okay.

STEVE: Is he?

BYRON: I thought I heard something on the news last night that he would -- you know, he'd been released. And I don't know what the --

STEVE: Oh, really?

BYRON: Yeah.

STEVE: I didn't know that.

BYRON: Did you, did you happen to see the, the press conference today?

STEVE: Yes, I did.

BYRON: Okay.

STEVE: And I was disappointed that -- in fact, Byron, the main reason I wanted to talk to you today is David, himself, heard it. I want to tell you, back in -- when I first met him was in '86, and he's not a writer. He doesn't get into writing. God has shown he -- he says God has shown him, as you and I know, has shown him many things, has opened up the -- all the prophets and everything to him, in vivid color, very clear. And in all this, as he's stated, about not writing, when I first met him, he had one thing he had written -- well, a number of things but at the time, but the last thing he wrote was back about like five, six years ago. I think I --
actually, about six years ago.

BYRON: Uh-huh.

STEVE: And I remember looking at it, sharing it with a number of people and, and after all that time, he's not written. God -- that letter that we gave to you was -- he put it down exactly as it was given to him.

BYRON: Well, I was -- you read that, I would imagine, right?

STEVE: Yes.

BYRON: In fact, who -- he didn't actually write it out, did he, 'cause it --

STEVE: Judy wrote it out.

BYRON: Okay.

STEVE: Actually, Judy did the writing. He, he, -- what he did, well, first, he wrote it out.

BYRON: Uh-huh.

STEVE: And his handwriting isn't that great.

BYRON: Okay.

STEVE: I mean it's okay, you can read it. But he wanted it a little more legible.

BYRON: Well, --

STEVE: So, then he had her -- in fact, he went over it and put emphasis and she wrote it as he
was reading it.

BYRON: Right. I had some, some concerns with it because it seemed -- everything that you and I have tried to do all along has been to, to work out any kind of problems we identified and, and tried to keep, you know, any kind of a perceived threat level down to a minimum. There, there was some pretty, pretty menacing comments in there. I mean I thought it was, it was very aggressive --

STEVE: Byron, it, it is but not, not when it comes to -- let, let's talk the spiritual realm because that's what -- you're dealing with something that -- I mean if God destroyed people in the days of Noah, he's going to do it again and it's going to be contrary to what you and I think.

BYRON: Okay, but you understand that, that we are not here to destroy you. We're here to try to resolve --

STEVE: No, no, I understand that.

BYRON: -- this thing out. And that letter was very threatening to the, to the FBI agents, like they're trying to --

STEVE: It's not to -- it's to the world, Byron.

BYRON: Okay. No, I under --
STEVE: Okay. Look at -- here's how the Bible works. If this guy's got divine inspiration, Byron, I mean if prophets came and said, God's going to do this, he's going to do that, he's going to destroy the world, he's going to bring upon a judgment upon the earth like in the days of Noah, I mean it's mercy, grace, love, concern for a fellow man to give something that's been shown to you. So, the last -- did you notice the last statement on the page? I was extremely disappointed that Bob Ricks did not mention Waco and the dam. You guys can scoff at it, you can think --

BYRON: Well, what did he mean -- what did he mean by that?

STEVE: He means exactly what it says. God showed him, told him, that -- exactly how the wording is there. I don't have it right in front of me but whatever it says there is exactly the way it came across.

BYRON: That the waters, the waters of the lake will be emptied through the broken dam?

STEVE: Exactly. I'm not even -- see, I'm not that familiar with Waco. Apparently, then they must have a dam. They must have a very large -- I know they have -- there's Lake Waco or something like
that.

BYRON: Right.

STEVE: I wasn't aware of a dam but, apparently, if they have a dam, --

(End of Tape #203)
