

- **Project Title:** The ElemMath Exploratory Research project

Principal Investigator: Samuel Obara

Department: Mathematics

Project Summary:

The ElemMath Exploratory Research project represented the first study in a trajectory of studies aimed at understanding how to maximize the impact of professional development on classroom instruction. This project was done in conjunction with MIG group at Hernandez intermediate school. I worked with three teachers in the lesson study project. Data collection was started at the beginning of the year and ended May 29 2008.

Publications:

The role of lesson study in teacher development -in progress.

External Grants Applied:

Career Grant (NSF): MidMath: Making Sense of Professional Development
