A Brief Glimpse
Into
Life and Offerings
At the
SOUTHWEST TEXAS STATE COLLEGE
San Marcos, Texas
SUMMER, 1945
TO MAY HIGH SCHOOL GRADUATES

1. America needs every man and woman to supply the manpower needs of this war.

2. Manpower is not dependent upon natural physical strength but is dependent upon the abilities which have been developed through education and training.

3. Effective college training will increase those powers which you now have so that you will be able to render far more effective service to society and your country.

4. The Southwest Texas State College Summer Session offers you an opportunity to develop those abilities which you have and to forge ahead of those who wait until September.

5. Courses in mathematics, physics, typewriting, shorthand, industrial arts, and others equally desirable will be offered this summer. These courses are required as a basis for practically every type of work in the armed services or in industry. Those who lay these foundations quickly and effectively may open unto themselves doors of opportunity which might otherwise remain closed.

6. At no time in our Nation’s history has youth’s responsibility been greater nor its obligation more real to train itself effectively for patriotic service in the teaching field, in the armed forces, or in industry.

7. The Southwest Texas State College invites you to use the facilities which it offers. Enrolment begins on June 4.

Southwest Texas State College

Forty-Second Annual
Summer Session
1945

TWELVE WEEKS—TWO TERMS
June 4 to July 14
July 16 to August 24

Entered as second class matter, January 15, 1912, at the Post-office, San Marcos, Texas, under the act of August 24, 1912
Vol. XI February, 1945 No. 6
SPECIAL FEATURES, SUMMER, 1945

1. Special Course in Audio-Visual Education to meet increased emphasis on this type of instruction.

2. Workshop in Inter-American Affairs.

3. A full program of Recreational Activity centered around Riverside on the beautiful San Marcos River.

4. Problems in Community Health, a special course under the joint auspices of the Departments of Health Education, Home Economics, Biology, and Education.

5. A Diagnostic and Remedial Reading Clinic sponsored this summer by the Education Department.

6. A Field School in Mexico for those interested in the study of Spanish and Spanish Art in a Spanish environment.

7. A special course in Conservation designed to meet the needs of teachers who are interested in conservation projects in their communities.

8. Aviation Education for those who are air-minded.

9. A Workshop in Education.

FORTY-SECOND SUMMER SESSION

The Forty-second Summer Session of the Southwest Texas State College will begin June 4 and close August 24, 1945. These forty-two years have been progressive ones for the College, both as to academic achievement and growth of physical plant. Academically the College was originally a one-year institution. In 1915 it became a two-year College, and in 1918 a full-fledged four-year College with the privilege of granting the Bachelor's degree. In 1936, with the addition of the Graduate School, the College became a five-year institution.

The College has made rapid strides forward in the improvement of its physical plant. A large number of modern, well-equipped buildings and facilities needed for a wholesome educational environment have been supplied on well-known College Heights.

ENTRANCE REQUIREMENTS

Entrance requirements are the same for the Summer Session as for the regular session. The usual minimum of fifteen affiliated units is required for admission by High School Diploma. Special arrangements, however, have been made concerning entrance of students from the armed forces. Students who have done College work elsewhere and who are not applicants for a degree may be admitted to Summer Session Courses on a statement of good standing from the Registrar of the institution last attended.
STANDING OF THE COLLEGE

The College is a member of the Southern Association of Colleges and Secondary Schools, The Association of Texas Colleges, and The American Association of Teachers Colleges. This assures students and graduates full accredited standing in any university or college in the United States.

EXPANDED LIST OF COURSES FOR FRESHMEN

During the present emergency the College has expanded its Summer offerings on the freshman level to accommodate high school graduates who wish to continue their educational preparation without interruption. The offerings this summer will include art, aviation, biology, chemistry, education, English, history, home economics, music, physical education, physics, typewriting, shorthand, and others equally desirable. Freshmen entering the Summer Session of 1945 may complete approximately a year's work by February, 1946, and may graduate with the Bachelor's degree in three years or less from time of entrance.

TEACHER SHORTAGE

There is an alarming shortage of teachers in every teaching field. The best opportunity in a generation is now open to young men and young women of talent and vision. Rapid promotions are achieved as never before by those who prepare themselves. The situation affords a chance for advancement as well as for the performance of a patriotic duty.

WORKSHOP IN INTER-AMERICAN AFFAIRS

For the third consecutive year the College has arranged a workshop for the purpose of dealing with all types of problems associated with the responsibilities of education in the development of friendly Inter-American relations. The workshop will be under the direction of Dr. E. O. Wiley, Director of Teacher Training, and will be staffed by members of the College faculty assisted by persons from the United States Office of Education and from the Office of the Coordinator of Inter-American Affairs who are skilled in dealing with schools where there is a large Latin American element.

GRADUATE SCHOOL

The Graduate School is open to students holding a Bachelor's degree from a recognized college or university. To acquire the M. A. degree the student must spend in residence a minimum of two semesters or its equivalent, and must complete at least thirty semester hours of work selected from courses carrying graduate credit.

The 456 men and women who have earned their Master's degree
at this College have found that the training has been extremely valuable to them in their respective fields, and that from an economic standpoint it has been highly remunerative. The acquisition of this higher degree becomes increasingly important as more and more schools look to the employment of Master's degree candidates in key positions.

The requirements for the Master of Arts degree have been altered so as to allow a student to do six semester hours in Research Problems in lieu of a thesis. For complete information concerning the Graduate School, write to the Executive Secretary of the Graduate Council.

DIAGNOSTIC AND REMEDIAL READING CLINIC

Progressive methods in diagnosing reading defects and in improving reading techniques and skills will be demonstrated in this clinic. Members of the Clinic will be given actual experience in working with children over a period of six weeks. The Clinic will be under the direction of Dr. Henryetta Sperle of New Jersey State Teachers College.

PROBLEMS IN COMMUNITY HEALTH

This course will be conducted primarily to present appropriate materials for use in the elementary school. The course will contain segments on nutrition, personal health, community health, the health examination, physical fitness measurements, community health surveys, accident prevention, and first aid. This course will be under the auspices of the Department of Physical and Health Education, assisted by the Departments of Home Economics, Education, and Biology.

ADVANTAGES OF LOW FEES

The cost of attending the summer sessions at Southwest Texas State College is considerably below that required at many colleges. The registration fee for each six weeks is $19.50, plus a trust fund deposit (refundable) of $2.00, making a total of $21.50.

LABORATORY SCHOOLS

The San Marcos Public Schools, elementary and high, will be in session during nine weeks of the Summer Term for the purpose of providing facilities for teaching and for demonstration.

BUREAU OF EDUCATIONAL SERVICE

The College operates a Bureau of Educational Service for the sole purpose of placing its clientele in good school positions. At the present time the call for teachers is far in excess of supply.

 WHY NOT STUDY IN MEXICO?

In Mexico you can learn Spanish and Art under ideal conditions, you can observe at first hand the way of life of Old Mexico, you can learn geography by seeing it, and acquire a breadth of understanding not obtainable from books alone. For complete information about the school please write to the Registrar.
A cool, yet friendly invitation . . .

RIVERSIDE

on the crystal clear San Marcos River

Riverside, at the foot of College Heights is one of the most attractive recreation parks in America. The water of the river, clear, cool, and sparkling, varies little in temperature from season to season. It is as pure as mountain spring water can be, for the source of this great volume of water is a gigantic system of springs less than a mile away. The swimming pool covers a distance along the river of more than 500 feet and is capable of accommodating a thousand swimmers at one time. In spite of this gigantic size, the water makes a complete change approximately five times each hour.
Attractions at RIVERSIDE

Courses in life-saving

Beginners classes in swimming

Water varying in depth to accommodate all ages

Ideal place for picnics

Concrete slab for dancing, formal and social

Soft ball, ping pong, volley ball,

Croquet, horse-shoe pitching, badminton

Concrete slab for skating
DEGREES AVAILABLE AT SOUTHWEST TEXAS STATE COLLEGE

Courses at Southwest Texas State College lead to the following degrees:

Bachelor of Arts

Bachelor of Science

Bachelor of Music Education

Bachelor of Business Administration

Master of Arts

PRE-PROFESSIONAL COURSES

Pre-Professional courses are offered in:

Law

Nursing

Medicine

Dentistry

Engineering

Journalism

Dietetics

AVIATION

You may learn to fly

Southwest Texas State College operates its own airport. The College offers the ground school courses and the student makes his own arrangements for flight instruction with Mr. Ragsdale, the college flight operator. A limited number of scholarships covering the cost of flight training will be offered. Those interested should apply to the Registrar.

AVIATION EDUCATION

Teachers may study Aviation Education

Would you like to be able to answer the perplexing questions your students ask about aviation? Then take Aviation Education, (Av. 53), for teachers which will be offered by the College this summer for the first time. This course is a general, non-technical course designed as a free elective for all students on the assumption that one of the most important phases of general education is an understanding of modern science and its social implications.
EDUCATION WORKSHOP

During the first half-session a special opportunity will be afforded experienced teachers to concentrate upon problems relating to their particular field. Prospective teachers will find this course most acceptable and former teachers returning to the profession will be able to "refresh" their professional knowledge in a practical way.

OPPORTUNITIES FOR VETERANS

The Southwest Texas State College, operating under the G.I. Bill of Rights and Public Law No. 16, has organized its curriculum to serve the interests and needs of ex-service men and women. The College offers courses of interest to each of the following groups:

1. Those desiring training in the vocations.
2. Those desiring two years of preparation in general education.
3. Those desiring pre-professional preparation for medical, law, dental, nursing, and engineering colleges.
4. Those wishing to complete the requirements leading to a Bachelor's or Master's degree.
5. Those desiring to become pilots.

Write to the Registrar for a copy of the special Veteran's Bulletin.
COURSE OFFERINGS
Summer—1945

The courses listed here will be offered as indicated together with additional courses if definite needs arise. However, the College reserves the right to cancel any course if the enrolment is insufficient to justify offering it.

COMBINE RECREATION WITH SUMMER STUDY

A majority of summer session students have been teaching or studying during the preceding months. Since this is true Southwest Texas State College believes play as well as work should be provided. A full recreational program has therefore been planned. Because of the gasoline and tire shortage, week-end camping trips may be reduced to a minimum this summer. However, those who can spare the gasoline can doubtless arrange for some trips to places of scenic interest such as are pictured here.
