Thank you and no problem. I've updated it with the new file sent and let me know if any other changes are needed:

**Subject:** Re: Riverside thesis

The photographs in the existing PDF are quite bad, look at page 20 and compare. There are a lot of photographs and clippings placed inside this thesis that are really cool and the existing PDF does not do them justice.

Also, the existing pdf is hard to read in some places. If you compare the table of contents page, the existing one is unreadable in some places.

Hi Nicole,

Thank you for sending. I've updated the metadata and included the note to contact University Archives for high resolution images.

I was wondering if you want to replace the existing PDF with the one sent via file transfer? They seem the same except for an additional page in the existing PDF, so is there something updated with this other version?

Happy to help with any changes and thanks.

Laura W.

Hi Laura,

I have another thesis we would like update the file for. It's too large to send through email (62.5 MB) so I just sent it over File Transfer.

<https://digital.library.txstate.edu/handle/10877/3349>

This thesis has quite a few original photographs attached and we have high res jpgs and tifs available if anyone asks. Could we add a note in the metadata saying something like "Contact University Archives for higher resolution images."

Let me know if you have any questions, thanks!

Nicole
